How to Avoid a Climate Disaster Oct 04 2021 #1 NEW YORK TIMES BEST SELLER

• In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

The Arab Revolution of 2011 Mar 17 2020 Comparative analysis of the 2011 Arab Spring uprisings. How do we make sense of the Arab revolution of 2011? What were its successes, its failures, and significance in world history? The Arab Revolution of 2011 brings together a broad range of perspectives to explain the causes, processes, and consequences of the revolution of 2011 and its critical implications for the future. The contributors, in this major addition to the sociology of revolutions, step back from the earlier euphoria of the Arab Spring to provide a sober analysis of what is still an ongoing process of upheaval in the Middle East. The essays address the role of national armies and foreign military intervention, the character and structure of old regimes as determinants of peaceful or violent political transformation, the constitutional placement of Islam in post-revolutionary regimes, and the possibilities of supplanting authoritarianism with democracy. The revolution of 2011 is also examined within a broad historical perspective, comparing the dynamics of revolution and counterrevolution in countries such as Tunisia, Egypt, and Libya with such epochal events as the European revolution of 1848 and Russia in 1917. Saïd Amir Arjomand is Distinguished Service Professor of Sociology and Director of the Stony Brook Institute for Global Studies at Stony Brook University, State University of New York. He is the author and editor of many books, including Social Theory and Regional Studies in the Global Age and (with Nathan J. Brown) The Rule of Law, Islam, and Constitutional Politics in Egypt and Iran, both also published by SUNY Press.

From computer blackmail, peer pressure, and gang violence to drug use, unwanted pregnancy, guilt and atonement, these characters face decisions that may affect the rest of their lives. There are many tough choices; there are no easy answers.

Smart Solutions to Climate Change Sep 03 2021 The failure of the Copenhagen climate conference in December 2009 revealed major flaws in the way the world's policy makers have attempted to prevent dangerous levels of increases in global temperatures. The expert authors in this specially commissioned collection focus on the likely costs and benefits of a very wide range of policy options, including geo-engineering, mitigation of CO2, methane and 'black carbon', expanding forest, research and development of low-carbon energy and encouraging green technology transfer. For each policy, authors outline all of the costs, benefits and likely outcomes, in fully referenced, clearly presented chapters accompanied by shorter, critical alternative perspectives. To further stimulate debate, a panel of economists, including three Nobel laureates, evaluate and rank the attractiveness of the policies. This authoritative and thought-provoking book will challenge

readers to form their own conclusions about the best ways to respond to global warming.

***An Honest Answer* Jan 27 2021 Winner of the 12th Annual Nicholas Roerich Poetry Prize**The presiding spirit behind Ginger Andrews' first book *An Honest Answer* must be William Carlos Williams. When he said he wrote in the speech of Polish mothers, he could have included the American working class anywhere. The sinewy resilience of Andrews' individual poems honors the tradition of his free verse lyrics. She listens for the poetic measure in American speech and reproduces it in unique forms. I would venture to say that the poetry of Ginger Andrews is as close to the tradition of Williams as American free verse has ever been.... As for the voice speaking to us in these poems, it is as fresh as Ray Carver's seemed 25 years ago. Another poet who comes to mind is her fellow Northwesterner Vern Rutsala, himself a descendent of Williams who, like Williams, has kept his eye on the working poor throughout his career. Andrews is a working class, born again Sappho, an Ahkmatova who cleans houses and teaches Sunday school. These figures come to mind not for the sake of hyperbole, but to help understand the originality of this new and remarkable poet.--From the preface by Mark Jarman
Ginger Andrews was born in North Bend, Oregon in 1956. Her poems have appeared in *The Hudson Review*, *Poetry*, *River Sedge*, *Fireweed* and *The American Voice*. In 1997, she received the Mary Scheirman Award at the Coos Bay Writers Conference. She cleans houses for a living, and is a janitor and Sunday school teacher at North Bend Church of Christ.

Adjectives in Germanic and Romance Aug 22 2020 Although the Germanic and Romance languages are two branches of the same language family and although both have developed the adjective as a separate syntactic and morphological category, the syntax, morphology, and interpretation of adjectives is by no means the same in these two language groups, and there is even variation within each of the language groups. One of the main aims of this volume is to map the differences and similarities in syntactic behavior, morphology, and meaning of the Germanic and Romance adjective and to find an answer to the following question: Are the (dis)similarities the result of autonomous developments in each of the two branches of the Indo-European language family, or are they caused by language contact?
