Astronomy Jul 14 2022 This book consists of two complete units on astronomy. The first unit is created for lower elementary students and the second one is for upper elementary grade levels. The units are designed for gifted students and encourage students to be responsible for their own education. Each unit is based on an interdisciplinary approach. Suggestions for adaptation of the units are also included.

The Discipline Advantage Aug 15 2022 The Detention Learning Packets are designed to provide constructive, positive learning experiences for students who have violated a school standard for behavior, and are serving a detention as punishment.

A Discipline-Based Teaching and Learning Center Nov 13 2019 This book describes the design and implementation of a discipline-specific model of professional development: the disciplinary Teaching and Learning Center (TLC). TLC was born from a strong commitment to improving undergraduate science education through supporting the front-line educators who play an essential role in this mission. The TLC's comprehensive approach encompasses consultation, seminars and workshops, acculturation activities for new faculty

members, and teaching preparatory courses as well as a certificate program for graduate students. At the University of Maryland, TLC serves biology and chemistry faculty members, postdoctoral associates, and graduate students. The Center is deeply integrated into the departmental culture, and its emphasis on pedagogical content knowledge makes its activities highly relevant to the community that it serves. The book reflects ten years of intensive work on the design and implementation of the model. Beginning with a needs assessment and continuing with ongoing evaluation, the book presents a wealth of information about how to design and implement effective professional development. In addition, it discusses the theory underlying each of the program components and provides an implementation guide for adopting or adapting the TLC model and its constituent activities at other institutions. In this book, the authors describe how they created the highly successful discipline-based Teaching and Learning Center at the University of Maryland. This is a must read for anyone interested in improving higher education. Charles Henderson, Co-Director, Center for Research on Instructional Change in Postsecondary Education, Western Michigan University This book will provide a much-needed resource for helping campus leaders and faculty development professionals create robust programs that meet the needs of science faculty. Susan Elrod, Dean, College of Science and Mathematics, Fresno State The authors provide a road map and guidance for higher education professional

development in the natural science for educators at all levels. While the examples are from the sciences, the approaches are readily adaptable to all disciplines. Spencer A. Benson, Director of the Centre for Teaching and Learning Enhancement, University of Macau

The Use of Self-learning Packets to Provide Education to Nursing Staff in a Long Term Care Facility Nov 06 2021

To Kill a Mockingbird May 20 2020 Presents resources and activities to use when teaching the classic novel involving two small children in a small Alabama town who are thrust into an adult world of racial bigotry and hatred when their lawyer father chooses to defend a black man charged with raping a white girl.
