Cases are resolved by motion practice, by informal settlement, or by formal procedures such as arbitration and mediation. Rarely does an attorney get to say, "Ladies and gentlemen of the jury" Does this change render deposition practice obsolete? Quite the opposite—depositions are more important than ever. Instead of a battle between attorneys who are trying to hide their evidence for trial, depositions are the place to put your best case forward, establish your case theories, explore the strengths and weaknesses of your case, and prepare your disposition strategy, be it a motion for summary judgment, a settlement offer, or mediation. Taking effective depositions in this changed environment involves a new paradigm, a whole new way of thinking about the discovery process. This book will guide you through that process, from interviewing and preparing your client through theory building and expert testimony. It also deals with concrete issues like creating a clean, understandable deposition record that will benefit your case throughout the

litigation process. With its Q&A format and its many examples, *The Deposition Tutorial* will become the book you want on your desk for quick reference. *The Best Fully Integrated Study System Available With hundreds of practice questions and hands-on exercises, RHCE Red Hat Certified Engineer Linux Study Guide, Fifth Edition* covers what you need to know--and shows you how to prepare--for this challenging exam. 100% complete coverage of all objectives for exam RH302 Exam Readiness Checklist at the front of the book--you're ready for the exam when all objectives on the list are checked off Inside the Exam sections in every chapter highlight key exam topics covered Real-world exercises modeled after hands-on exam scenarios Two complete lab-based exams simulate the format, tone, topics, and difficulty of the real exam Bonus content (available for download) includes installation screen review, basic instructions for using VMware and Xen as testbeds, and paper and pencil versions of the lab exams Covers all RH302 exam topics, including: Hardware installation and configuration The boot process Linux filesystem administration Package management and Kickstart User and group administration System administration tools Kernel services and configuration Apache and Squid Network file sharing services (NFS, FTP, and Samba) Domain Name System (DNS) E-mail (servers and clients) Extended Internet Services Daemon (xinetd), the Secure package, and DHCP The X Window System Firewalls, SELinux, and troubleshooting The Virginia 2020 Journeyman study guide will help you prepare for the exam by providing 12 practice open book exams and 2 Final Closed Book Exams.
