Climate change governance is in a state of enormous flux. New and more dynamic forms of governing are appearing around the international climate regime centred on the United Nations Framework Convention on Climate Change (UNFCCC). They appear to be emerging spontaneously from the bottom up, producing a more dispersed pattern of governing, which Nobel Laureate Elinor Ostrom famously described as 'polycentric'. This book brings together contributions from some of the world's foremost experts to provide the first systematic test of the ability

of polycentric thinking to explain and enhance societal attempts to govern climate change. It is ideal for researchers in public policy, international relations, environmental science, environmental management, politics, law and public administration. It will also be useful on advanced courses in climate policy and governance, and for practitioners seeking incisive summaries of developments in particular sub-areas and sectors. This title is also available as Open Access on Cambridge Core. In Greek mythology, Alcestis is known as the good wife - she loved her husband so much that she died to save his life and was sent to the underworld in his place. In this poetic and vividly imagined debut, Katharine Beutner gives voice to the woman behind the ideal, bringing to life the world of Mycenaean Greece and the part of the story that has never been told: how Alcestis falls in love with the goddess Persephone and discovers the true horror and beauty of death. Individuals vary in their ability to reflect on and override partisan impulses, affecting their ability to rationally evaluate politicians. For twenty years this award-winning compilation has been the nonpareil benchmark against which all other annual fantasy and horror collections are judged. Directed first by Ellen Datlow and Terri Windling and for the past four years by Datlow and Kelly Link and Gavin J. Grant, it consistently presents the strangest, the funniest, the darkest, the sharpest, the most original—in short, the best fantasy and horror. The current collection, marking a score of years, offers more than forty stories and poems from almost as many sources. Summations of the field by the editors are complemented by articles by Edward Bryant, Charles de Lint, and Jeff VanderMeer, highlighting the best of the fantastic in, respectively, media, music, and comics, as well as honorable mentions—notable works that didn't quite make

the cut, but are nonetheless worthy of attention. The Year's Best Fantasy and Horror: Twentieth Annual Collection is a cornucopia of fantastic delights, an unparalleled resource and indispensable reference that captures the unique excitement and beauty of the fantastic in all its gloriously diverse forms, from the lightest fantasy to the darkest horror. This volume brings together cutting-edge experimental research from leaders in the fields of linguistics and psycholinguistics to explore the nature of a phenomenon that has long been central to syntactic theory - 'island effects'. The chapters in this volume draw upon recent methodological advances in experimental methods in syntax, also known as 'experimental syntax', to investigate the underlying cognitive mechanisms that give rise to island effects. This volume presents a comprehensive empirical review of a contemporary debate in the field by including contributions from researchers representing a variety of points of view on the nature of island effects. This book is ideal for students and researchers interested in cutting-edge experimental techniques in linguistics, psycholinguistics and psychology.

The first comprehensive history of the Lakota Indians and their profound role in shaping America's history Named One of the New York Times Critics' Top Books of 2019 - Named One of the 10 Best History Books of 2019 by Smithsonian Magazine - Winner of the MPIBA Reading the West Book Award for narrative nonfiction "Turned many of the stories I thought I knew about our nation inside out."--Cornelia Channing, Paris Review, Favorite Books of 2019 "My favorite non-fiction book of this year."--Tyler Cowen, Bloomberg Opinion "A brilliant, bold, gripping history."--Simon Sebag Montefiore, London Evening Standard, Best Books of 2019 "All nations deserve to have their

stories told with this degree of attentiveness"--Parul Sehgal, New York Times This first complete account of the Lakota Indians traces their rich and often surprising history from the early sixteenth to the early twenty-first century. Pekka Hämäläinen explores the Lakotas' roots as marginal hunter-gatherers and reveals how they reinvented themselves twice: first as a river people who dominated the Missouri Valley, America's great commercial artery, and then--in what was America's first sweeping westward expansion--as a horse people who ruled supreme on the vast high plains. The Lakotas are imprinted in American historical memory. Red Cloud, Crazy Horse, and Sitting Bull are iconic figures in the American imagination, but in this groundbreaking book they emerge as something different: the architects of Lakota America, an expansive and enduring Indigenous regime that commanded human fates in the North American interior for generations. Hämäläinen's deeply researched and engagingly written history places the Lakotas at the center of American history, and the results are revelatory. From the author of the acclaimed *Promise Not to Tell* comes a chilling and perfectly plotted tale in which crimes of the past and present blend in a mesmerizing tale of mystery, shattered innocence, guilt, and redemption On her way to a job interview, Rhonda never expected to get caught in the middle of a crime. Sitting in her blue Honda at a gas station, she saw a person dressed as a rabbit grab a young girl out of nearby car. Confused by the absurdity of the rabbit costume, Rhonda does nothing at first. By the time she regains her senses, however, the kidnapper and child are gone. Plagued by guilt, she's determined to help with the investigation. But as she gets closer to discovering the kidnapper's identity, she

also gets closer to uncovering the truth behind the disappearance of another child—her best friend Lizzy who went missing years before. As Rhonda races to solve the two overlapping mysteries, she rekindles an old romance, learns that people from her past are far different than what they seemed, and ultimately finds liberation. Filled with compelling, realistic characters, twisting suspense, and creepy turns that will have readers flying through the pages, *Island of Lost Girls* is a remarkable display of narrative genius from a stellar new talent.

The house mouse is the source of almost all genetic variation in laboratory mice; its genome was sequenced alongside that of humans, and it has become the model for mammalian speciation. Featuring contributions from leaders in the field, this volume provides the evolutionary context necessary to interpret these patterns and processes in the age of genomics. The topics reviewed include mouse phylogeny, phylogeography, origins of commensalism, adaptation, and dynamics of secondary contacts between subspecies. Explorations of mouse behaviour cover the nature of chemical and ultrasonic signalling, recognition, and social environment. The importance of the mouse as an evolutionary model is highlighted in reviews of the first described example of meiotic drive (t-haplotype) and the first identified mammalian speciation gene (*Prdm9*). This detailed overview of house mouse evolution is a valuable resource for researchers of mouse biology as well as those interested in mouse genetics, evolutionary biology, behaviour, parasitology, and archaeozoology.

Part memoir, part lies, this imaginative tale is a story about loving a woman made of paper, about the wounds made by first love and sharp objects. Cooperative breeders are species in which individuals beyond a pair assist in the production of young in a

single brood or litter. Although relatively rare, cooperative breeding is widespread taxonomically and continues to pose challenges to our understanding of the evolution of cooperation and altruistic behavior. Bringing together long-term studies of cooperatively breeding birds, mammals, and fish, this volume provides a synthesis of current studies in the field. The chapters are organised by individual studies of particular species or (in the case of mole-rats) two closely related cooperatively breeding species. Each focuses not only on describing behavior and ecology but also on testing evolutionary hypotheses for the form and function of the diverse and extraordinary cooperative breeding lifestyles that have been discovered. This unique and comprehensive text will be of interest to graduate students and researchers of behavioral ecology and the evolution of cooperation.

Nordic myth, murder, and total apathy collide in this hilarious novel where “Nabokov meets Lemony Snicket in this manic Chinese box version of a mystery” (Publishers Weekly). Our Heroine is a former professor of Scandinavian Studies at Iceland’s New Crúiskeen university whose current interests include drinking, sleeping, and drinking. But when an aspiring author is found murdered the day before the annual celebration in remembrance of Our Heroine’s mother—the legendary crime-stopper and evil-thwarter Emily Bean—everyone expects Our Heroine to follow in her mother’s footsteps and solve the case. She, however, has no interest in inheriting the family business . . . or being chased through a steam-tunnel . . . or listening to skaldic karaoke . . . or fleeing the inhuman Refurserkir (don’t ask!). Unfortunately for her, this particular evil has no interest in Our Heroine’s total lack of interest. . . . A Nabokovian goof on Agatha

Christie, a madcap mystery that is part *The Third Policeman* and part *The Da Vinci Code*, *The Iceman* is a truly original work “born out of hysterical laughter and a lingering sense of childhood adventure” (Los Angeles Times). This searing, extraordinarily evocative narrative opens with a man in his house at dawn, surrounded by aspens, coyotes cackling in the distance as he quietly navigates the distance between present and past. As memory overtakes him, he sees the bygone America of his childhood: the farmland and the feedlots, the railyards and the diners—and, most hauntingly, his father’s young girlfriend, with whom he also became involved, setting into motion a tragedy that has stayed with him. His complex interiority is filtered through views of mountains and deserts as he drives across the country, propelled by Benzedrine, rock and roll, and a restlessness born out of exile. The rhythms of theater, the language of poetry, and a flinty humor combine in this stunning meditation on the nature of experience, at once celebratory, surreal, poignant, and unforgettable.

'IMAGINATIVE AND COMPELLING' Juliet Marillier, author of the *Sevenwaters Series* **THERE IS A VERY OLD STORY, RARELY TOLD, OF A WOLF THAT RUNS INTO THE OCEAN AND BECOMES A WHALE.** Born with the soul of a hunter and chosen by the spirit of the Wolf, Omat is destined to follow in her grandfather's footsteps - invoking the spirits of the land, sea and sky to protect her people. But the gods have stopped listening, the seals won't come and Omat's family is starving. Alone at the edge of the world, hope is the only thing they have left. Desperate to save them, Omat journeys across the icy wastes, fighting for survival with every step. When she meets a Viking warrior and his strange new gods, they set in motion a

conflict that could shatter her world . . . or save it. Blending myth and magic from Norse and Inuit folklore, *The Wolf in The Whale* is a captivating tale of identity and survival featuring an unforgettable narrator who will do anything to protect those she loves, even confront the gods themselves. 'I honestly could not put into words how much I loved this book . . . one of my favorite books I've ever read . . . From ancient Mesopotamia to today, the epic story of how humans have used laws to forge civilizations Rulers throughout history have used laws to impose order. But laws were not simply instruments of power and social control. They also offered ordinary people a way to express their diverse visions for a better world. In *The Rule of Laws*, Oxford scholar Fernanda Pirie traces the rise and fall of the sophisticated legal systems underpinning ancient empires and religious traditions, while also showing how common people—tribal assemblies, merchants, farmers—called on laws to define their communities, regulate trade, and build civilizations. Although legal principles originating in Western Europe now seem to dominate the globe, the variety of the world's laws has long been almost as great as the variety of its societies. What truly unites human beings, Pirie argues, is our very

faith that laws can produce justice, combat oppression, and create order from chaos. Are humans unique? This simple question, at the very heart of the hybrid field of biological anthropology, poses one of the false dichotomies—with a stereotypical humanist answering in the affirmative and a stereotypical scientist answering in the negative. The study of human biology is different from the study of the biology of other species. In the simplest terms, people's lives and welfare may depend upon it, in a sense that they may not depend on the study of other scientific subjects. Where science is used to validate ideas—four out of five scientists preferring a brand of cigarettes or toothpaste—there is a tendency to accept the judgment as authoritative without asking the kinds of questions we might ask of other citizens' pronouncements. There has been a rapid expansion of academic interest and publications on polycentricity. In the contemporary world, nearly all governance situations are polycentric, but people are not necessarily used to thinking this way. *Governing Complexity* provides an updated explanation of the concept of polycentric governance. The editors provide examples of it in contemporary settings involving complex natural resource systems, as well as a critical evaluation of the utility of the concept. With contributions from leading scholars in the field, this book makes the case that polycentric governance arrangements exist and it is possible for polycentric arrangements to perform well, persist for long periods, and adapt. Whether they actually function well, persist, or adapt depends on multiple factors that are reviewed and discussed, both theoretically and with examples from actual cases. *Chemical and Synthetic Biology Approaches to Understand Cellular Functions - Part C, Volume 633*, the latest release in the *Methods in*

Enzymology series, continues the legacy of this premier serial. This release includes sections on Next generation probes for molecular imaging in cells, Competitive binding assay for biotin and biotin derivatives, based on avidin and biotin-4-fluorescein, Converting avidin to bind ligands other than biotin, especially steroids, Chemoenzymatic Labeling Strategy, Engineered Siderophores, Small molecules to inhibit bacterial population behavior, NMR tube bioreactor, Small molecule controlled RAS activation system, Small molecule regulated Cas9, the Design and application of synthetic receptors, and much more. Contains the authority of authors who are leaders in their field Provides a comprehensive source on new methods and research in enzymology

'The Last Viking is a masterful and pulse-pounding narrative that transports the reader into the middle of the action.'

Carl Gnam, Military Heritage Harald Sigurdsson burst into history as a teenaged youth in a Viking battle from which he escaped with little more than his life and a thirst for vengeance. But from these humble origins, he became one of Norway's most legendary kings. The Last Viking is a fast-moving narrative account of the life of King Harald Hardrada, as he journeyed across the medieval world, from the frozen wastelands of the North to the glittering towers of Byzantium and the passions of the Holy Land, until his warrior death on the battlefield in England. Combining Norse sagas, Byzantine accounts, Anglo-Saxon chronicles, and even King Harald's own verse and prose into a single, compelling story, Don Hollway vividly depicts the violence and spectacle of the late Viking era and delves into the dramatic events that brought an end to almost three centuries of Norse conquest and expansion. Donald Trump's election has called into question many fundamental

assumptions about politics and society. Should the forty-fifth president of the United States make us reconsider the nature and future of the global order? Collecting a wide range of perspectives from leading political scientists, historians, and international-relations scholars, *Chaos in the Liberal Order* explores the global trends that led to Trump's stunning victory and the impact his presidency will have on the international political landscape. Contributors situate Trump among past foreign policy upheavals and enduring models for global governance, seeking to understand how and why he departs from precedents and norms. The book considers key issues, such as what Trump means for America's role in the world; the relationship between domestic and international politics; and Trump's place in the rise of the far right worldwide. It poses challenging questions, including: Does Trump's election signal the downfall of the liberal order or unveil its resilience? What is the importance of individual leaders for the international system, and to what extent is Trump an outlier? Is there a Trump doctrine, or is America's president fundamentally impulsive and scattershot? The book considers the effects of Trump's presidency on trends in human rights, international alliances, and regional conflicts. With provocative contributions from prominent figures such as Stephen M. Walt, Andrew J. Bacevich, and Samuel Moyn, this timely collection brings much-needed expert perspectives on our tumultuous era. Darwin famously described special difficulties in explaining social evolution in insects. More than a century later, the evolution of sociality - defined broadly as cooperative group living - remains one of the most intriguing problems in biology. Providing a unique perspective on the study of social evolution, this volume

synthesizes the features of animal social life across the principle taxonomic groups in which sociality has evolved. The chapters explore sociality in a range of species, from ants to primates, highlighting key natural and life history data and providing a comparative view across animal societies. In establishing a single framework for a common, trait-based approach towards social synthesis, this volume will enable graduate students and investigators new to the field to systematically compare taxonomic groups and reinvigorate comparative approaches to studying animal social evolution. Experimental Syntax is an area that is rapidly growing as linguistic research becomes increasingly focused on replicable language data, in both fieldwork and laboratory environments. The first of its kind, this Handbook provides an in-depth overview of current issues and trends in this field, with contributions from leading international scholars. It pays special attention to sentence acceptability experiments, outlining current best practices in conducting tests, and pointing out promising new avenues for future research. Separate sections review research results from the past 20 years, covering specific syntactic phenomena and language types. The handbook also outlines other common psycholinguistic and neurolinguistic methods for studying syntax, comparing and contrasting them with acceptability experiments, and giving useful perspectives on the interplay between theoretical and experimental linguistics. Providing an up-to-date reference on this exciting field, it is essential reading for students and researchers in linguistics interested in using experimental methods to conduct syntactic research. This public domain book is an open and compatible implementation of the Uniform System of Citation. This is an

annotated bibliography of English language novels which feature libraries or librarians from the 18th to the 21st century. It includes descriptions and quotes from the text. It includes novels, mysteries, science fiction, fantasy, and romance. From the Nobel Prize-winning Icelandic author, a magnificent, epic novel—"funny, clever, sardonic and brilliant" (Annie Proulx)—at last available to contemporary American readers. Set in the early twentieth century, *Independent People* recalls both Iceland's medieval epics and such classics as Sigrid Undset's *Kristin Lavransdatter*. If Bjartur of *Summerhouses*, the book's protagonist, is an ordinary sheep farmer, his flinty determination to achieve independence is genuinely heroic and, at the same time, terrifying and bleakly comic. Having spent eighteen years in humiliating servitude, Bjartur wants nothing more than to raise his flocks un beholden to any man. But Bjartur's spirited daughter wants to live un beholden to him. What ensues is a battle of wills that is by turns harsh and touching, elemental in its emotional intensity and intimate in its homely detail. Vast in scope and deeply rewarding, *Independent People* is a masterpiece.

Chronicles the rise of the iconic German shepherd character while sharing the stories of the real WWI dog and the canine performer in the 1950s television show, and explores Rin Tin Tin's relevance in the military and popular culture. The marvelous story of the Flatiron: the instantly recognizable building that signaled the start of a new era in New York history. Critics hated it. The public feared it would topple over. Passersby were knocked down by the winds. But even before it was completed, the Flatiron Building had become an unforgettable part of New York City. The Flatiron Building was built by the Chicago-based Fuller Company--a group

founded by George Fuller, "the father of the skyscraper"--to be their New York headquarters. The company's president, Harry Black, was never able to make the public call the Flatiron the Fuller Building, however. Black's was the country's largest real estate firm, constructing Macy's department store, and soon after the Plaza Hotel, the Savoy Hotel, and many other iconic buildings in New York as well as in other cities across the country. With an ostentatious lifestyle that drew constant media scrutiny, Black made a fortune only to meet a tragic, untimely end. In *The Flatiron*, Alice Sparberg Alexiou chronicles not just the story of the building but the heady times in New York at the dawn of the twentieth century. It was a time when Madison Square Park shifted from a promenade for rich women to one for gay prostitutes; when photography became an art; motion pictures came into existence; the booming economy suffered increasing depressions; jazz came to the forefront of popular music--and all within steps of one of the city's best-known and best-loved buildings.

The Changing Face of Corruption in the Asia Pacific: Current Perspectives and Future Challenges is a contemporary analysis of corruption in the Asia-Pacific region. Bringing academicians and practitioners together, contributors to this book discuss the current perspectives of corruption's challenges in both theory and practice, and what the future challenges will be in addressing corruption's proliferation in the region. Includes viewpoints from both practitioners and academic contributors on corruption in the Asia Pacific region Offers a strong theoretical background together with the practical experience of contributors Explores what the future challenges will be in addressing corruption's proliferation in the region Aimed at both the

academic and professional audience The interstellar Realm of the Glorious Dawn has endured for eight centuries, providing stability and law in the wake of the Long Darkness. Now the assassination of King Tunus has plunged the Realm into civil war, and through the years eleven very different people get caught up in major events. An ageing royal guard, an opportunistic rogue, an inscrutable mystic, an ambitious mercenary, a weary partisan fighter... all these and more find themselves in a spot where great events must turn on their actions. As the Realm burns, young Princess Maraka, sole rightful heir to the throne, must weather tragedy, assassins, and the pressure of being a living lynchpin for the loyalist war effort. Before her lies a monumental task: Becoming more than a mere symbol. She must become the leader her battered subjects need.

The relationship between race and capitalism is one of the most enduring and controversial historical debates. The concept of racial capitalism offers a way out of this impasse. Racial capitalism is not simply a permutation, phase, or stage in the larger history of capitalism—since the beginning of the Atlantic slave trade and the colonization of the Americas, capitalism, in both material and ideological senses, has been racial, deriving social and economic value from racial classification and stratification. Although Cedric J. Robinson popularized the term, racial capitalism has remained undertheorized for nearly four decades. *Histories of Racial Capitalism* brings together for the first time distinguished and rising scholars to consider the utility of the concept across historical settings. These scholars offer dynamic accounts of the relationship between social relations of exploitation and the racial terms through which they were organized, justified, and contested. Deploying an eclectic array of

methods, their works range from indigenous mortgage foreclosures to the legacies of Atlantic-world maroons, from imperial expansion in the continental United States and beyond to the racial politics of municipal debt in the New South, from the ethical complexities of Latinx banking to the postcolonial dilemmas of extraction in the Caribbean. Throughout, the contributors consider and challenge how some claims about the history and nature of capitalism are universalized while others remain marginalized. By theorizing and testing the concept of racial capitalism in different historical circumstances, this book shows its analytical and political power for today's scholars and activists. A Los Angeles Times Best Non-Fiction Book of 2007 A Boston Globe Best Non-Fiction Book of 2007 Amazon.com Editors pick as one of the 10 best history books of 2007 Winner of the 2007 John Lyman Award for U. S. Maritime History, given by the North American Society for Oceanic History "The best history of American whaling to come along in a generation." —Nathaniel Philbrick The epic history of the "iron men in wooden boats" who built an industrial empire through the pursuit of whales. "To produce a mighty book, you must choose a mighty theme," Herman Melville proclaimed, and this absorbing history demonstrates that few things can capture the sheer danger and desperation of men on the deep sea as dramatically as whaling. Eric Jay Dolin begins his vivid narrative with Captain John Smith's botched whaling expedition to the New World in 1614. He then chronicles the rise of a burgeoning industry—from its brutal struggles during the Revolutionary period to its golden age in the mid-1800s when a fleet of more than 700 ships hunted the seas and American whale oil lit the world, to its decline as the twentieth

century dawned. This sweeping social and economic history provides rich and often fantastic accounts of the men themselves, who mutinied, murdered, rioted, deserted, drank, scrimshawed, and recorded their experiences in journals and memoirs.

Containing a wealth of naturalistic detail on whales, *Leviathan* is the most original and stirring history of American whaling in many decades. *She Persisted: Thirty Ten-Minute Plays by Women over Forty* is a collection of plays by members of Honor Roll!, an advocacy group of women over forty. About Honor Roll!: "Honor Roll! is an advocacy and action group of women+ playwrights over forty—and our allies—whose goal is our inclusion in theater. The term "women+" refers to a spectrum of gender identification that includes women, non-binary identifiers, and trans. We are the generation excluded at the outset of our careers because of sexism, now overlooked because of ageism. We celebrate diversity in theater, and work to call attention to the negative impact of age discrimination alongside gender, race, ethnicity, faith, socioeconomic status, disability, and sexual orientation in the American Theatre and beyond." "These women are in their forties and fifties and sixties, and they have been writing a long time, and they are at the height of their craft. These are tight, complex, nuanced pieces of writing, which no one has seen because for too long they weren't looking. These are important writers, and important plays." —Theresa Rebeck, from the introduction

Transitional justice has become the principle lens used by countries emerging from conflict and authoritarian rule to address the legacies of violence and serious human rights abuses. However, as transitional justice practice becomes more institutionalized with support from NGOs and funding from

Western donors, questions have been raised about the long-term effectiveness of transitional justice mechanisms. Core elements of the paradigm have been subjected to sustained critique, yet there is much less commentary that goes beyond critique to set out, in a comprehensive fashion, what an alternative approach might look like. This volume discusses one such alternative, transformative justice, and positions this quest in the wider context of ongoing fall-out from the 2008 global economic and political crisis, as well as the failure of social justice advocates to respond with imagination and ambition. Drawing on diverse perspectives, contributors illustrate the wide-ranging purchase of transformative justice at both conceptual and empirical levels. Kenji Miyazawa (1896-1933) is one of Japan's most beloved writers and poets, known particularly for his sensitive and symbolist children's fiction. This volume collects stories that focus on Miyazawa's love of space and his use of the galaxy as a metaphor for the concepts of purity, self-sacrifice, and faith, which were near and dear to his heart. "The Nighthawk Star" follows a lowly bird as he struggles to transform himself into something greater, a constellation in the night sky; "Signal & Signal-less" depicts a pair of star-crossed train signals who dream of eloping to the moon; and "Night on the Galactic Railroad," Miyazawa's most famous work, tells the story of two boys as they journey upon a train that traverses the Milky Way, learning the true meaning of friendship, happiness, and life itself along the way. This internationally acclaimed winner of the Finlandia Award is "a brilliant and dark parable about the fluid boundaries between human and animal" (The Boston Globe). Angel, a young photographer, comes home from a night of carousing to find a group of drunken teenagers in the courtyard of

his apartment building, taunting a wounded, helpless young troll. He takes it in, not suspecting the dramatic consequences of this decision. What does one do with a troll in the city? As the troll's presence influences Angel's life in ways he could never have predicted, it becomes clear that the creature is the familiar of man's most forbidden feelings. A novel of sparkling originality, *Troll* is a wry, beguiling story of nature and man's relationship to wild things, and of the dark power of the wildness in ourselves. "[An] imaginative and engaging novel of urban fantasy . . . The stuff of ancient legend shadows with rather unnerving precision the course of unloosed postmodern desire." —Chris Lehmann, *The Washington Post Book World* "[An] impressive debut short story collection . . . These haunting stories deserve a wide audience" (*Library Journal*, starred review). Winner of the 2015 PEN/Hemingway Award The stories in *Elegy on Kinderklavier* explore the profound loss and intricate effects of war on lives that have been suddenly misaligned. A diplomat navigates a hostile political climate and an arranged marriage in an Israeli settlement on a newly discovered planet; a small town in Kansas shuns the army recruiter who signed up its boys as troops are deployed to Iraq, falling in helicopters and on grenades; a family dissolves around mental illness and a child's body overtaken by cancer. The moment a soldier steps on an explosive device is painfully reproduced, nanosecond by nanosecond. Arna Bontemps Hemingway's stories feel pulled out of time and place, and the suffering of his characters seem at once otherworldly and stunningly familiar. *Elegy on Kinderklavier* is a disquieting exploration of what it is to lose and be lost. "Story after story, this collection surprised me and set my mind ablaze." —Alan

Heathcock, author of Volt “Arna Hemenway writes a fiction whose satisfactions are not merely narrative but musical, and it is a pleasure to listen to his stories as they rise into song.” —Kevin Brockmeier, author of A Few Seconds of Radiant Filmstrip “Death is an imminent, lurking presence in this debut collection of seven stories, which explore the confluence of fate and circumstance that places men in situations of anguish and despair.” —Publishers Weekly “In Star Trek, crew members travel to unusual planets, meet diverse beings, and encounter unique civilizations. In these remarkable space adventures, does Star Trek reflect biology and evolution as we know it? What can the science in the science fiction of Star Trek teach us?” --Back cover
