Recent Advances in Power Systems Oct 23 2020 This book presents select proceedings of Electric Power and Renewable Energy Conference 2020 (EPREC 2020). This book provides rigorous discussions, case studies, and recent developments in the emerging areas of the power system, especially, renewable energy conversion systems, distributed generations, microgrid, smart grid, HVDC & FACTS, power system protection, etc. The readers would be benefited in terms of enhancing their knowledge and skills in the domain areas. The book will be a valuable reference for beginners, researchers, and professionals interested in developments in the power system.

Awakening of the Soul Oct 15 2022 In 2002, Grace J. Scott began to receive messages from those beyond the grave. Grace felt it her duty to record their voices, their thoughts, and even their warnings. *Awakening of the Soul* is the amazing result. This intriguing collection of channeled thoughts from souls in heaven, other planetary systems, and other universes will benefit those seeking spiritual growth as well as those wanting information about preparing for upcoming Earth changes. Much of the material is packed with information and requires time to read and digest while other material is simple and easily understood. Presented in chronological order as received in reflexology sessions, the conversations are completely original, unedited, and unorganized, straight from the spirit itself. Some spirits channeled big lessons for the general public or gave messages to individuals while some explained disasters, politics, wars, dreams, and events in our daily lives. But all of the souls have one thing in common: they bring news that Earth is cleansing itself at a rapid pace, and they are here to assist us through the cleansing and beyond. Epic in scope, *Awakening of the Soul* is a vital tool for those looking to the future and to the fate of Earth itself.

Advances in Pectin and Pectinase Research Apr 16 2020 The second international symposium on Pectins and Pectinases was organised by Wageningen University and Research Centre and was held in Rotterdam, May 6-10, 2001. This fruitful meeting was attended by around 130 participants from more than 20 countries, representing almost all of the groups/industries working worldwide on pectins and pectinases. Following the first meeting on this subject held in December 1995, the symposium definitely forms a platform for researchers and industries working in the field, all within their own discipline and expertise. The symposium book contains most keynote lectures and other oral presentations and provides an update about the current research. It is clearly demonstrated that significant progress has been made during the past seven years. The progress in the elucidation of the chemical structure of pectin and mode of action and 3-D structure of the pectin-degrading enzymes allows us more and more to identify (and influence) the functionality of pectins and pectic enzymes, both in vitro after isolation as well as in the plants themselves (in planta). Other contributions deal with new applications of both pectin and pectin-degrading enzymes, while more and more attention is paid to health and nutritional aspects of pectins.

WebDav Jan 06 2022 WebDAV: Next-Generation Collaborative Web Authoring is the complete guide to Web-based Distributed Authoring and Versioning (WebDAV), the IETF standard for Web authoring and wide area collaboration. Experienced implementer Lisa Dusseault covers WebDAV from bits on the wire up to custom application implementation, demonstrating with extensive examples and traces from real clients and servers. Coverage includes: practical rules for building WebDAV document management systems; step-by-step, Internet Explorer compatible sample applications; and the latest WebDAV tools. For application designers, software engineers, and information managers.

Geothermics in Basin Analysis Sep 21 2020 *Geothermics in Basin Analysis* focuses on the study of sedimentary basins, stressing essential parts of problems in which geothermics is involved. Subject matter includes the measuring of temperature logs and capturing of industrial temperature data and their interpretation to delineate subsurface conditions and processes, the importance of porosity and pore filling for modeling thermal fields, the thermal insulation of shales, geothermal anomalies associated with mud diapirs and basin hydrodynamic regimes, temperatures related to magmatic underplating and plate tectonics.

Sociology for nurses 2/e Nov 04 2021 In its pursuit to bring about an awakening among students of nursing about human social behavior, this second edition of *Sociology for Nurses* continues to build on sociological theories that are of relevance to the nursing community. Conforming to the syllabus prescribed by the Indian Nursing Council

and catering to the needs of second year B. Sc Nursing students, this book provides jargon-free explanation of even the most difficult concepts to the student's benefit.

Mastering Embedded Linux Programming Aug 21 2020 Master the techniques needed to build great, efficient embedded devices on Linux About This Book Discover how to build and configure reliable embedded Linux devices This book has been updated to include Linux 4.9 and Yocto Project 2.2 (Morty) This comprehensive guide covers the remote update of devices in the field and power management Who This Book Is For If you are an engineer who wishes to understand and use Linux in embedded devices, this book is for you. It is also for Linux developers and system programmers who are familiar with embedded systems and want to learn and program the best in class devices. It is appropriate for students studying embedded techniques, for developers implementing embedded Linux devices, and engineers supporting existing Linux devices. What You Will Learn Evaluate the Board Support Packages offered by most manufacturers of a system on chip or embedded module Use Buildroot and the Yocto Project to create embedded Linux systems quickly and efficiently Update IoT devices in the field without compromising security Reduce the power budget of devices to make batteries last longer Interact with the hardware without having to write kernel device drivers Debug devices remotely using GDB, and see how to measure the performance of the systems using powerful tools such as `perf`, `ftrace`, and `valgrind` Find out how to configure Linux as a real-time operating system In Detail Embedded Linux runs many of the devices we use every day, from smart TVs to WiFi routers, test equipment to industrial controllers - all of them have Linux at their heart. Linux is a core technology in the implementation of the inter-connected world of the Internet of Things. The comprehensive guide shows you the technologies and techniques required to build Linux into embedded systems. You will begin by learning about the fundamental elements that underpin all embedded Linux projects: the toolchain, the bootloader, the kernel, and the root filesystem. You'll see how to create each of these elements from scratch, and how to automate the process using Buildroot and the Yocto Project. Moving on, you'll find out how to implement an effective storage strategy for flash memory chips, and how to install updates to the device remotely once it is deployed. You'll also get to know the key aspects of writing code for embedded Linux, such as how to access hardware from applications, the implications of writing multi-threaded code, and techniques to manage memory in an efficient way. The final chapters show you how to debug your code, both in applications and in the Linux kernel, and how to profile the system so that you can look out for performance bottlenecks. By the end of the book, you will have a complete overview of the steps required to create a successful embedded Linux system. Style and approach This book is an easy-to-follow and pragmatic guide with in-depth analysis of the implementation of embedded devices. It follows the life cycle of a project from inception through to completion, at each stage giving both the theory that underlies the topic and practical step-by-step walkthroughs of an example implementation.

The Witches' Sabbath Sep 02 2021 Explore the mesmerizing history, lore, and traditions surrounding an event that has long been shrouded in fear and mystery—the Witches' Sabbath. This book invites you to learn what it is, how you can get there, and what to do once you are there. Author Kelden presents in-depth historical information on the Sabbath as well as its place within modern Witchcraft. The Witches' Sabbath explores a wide variety of topics, from the earliest days of the Sabbath to the contemporary practice of journeying there. Along with compelling stories and impressive research, this book offers rituals, recipes, and folkloric techniques. From the truth behind the witch's flight to the Sabbath's depiction in art, this book is the ultimate resource for understanding the mysteries of this fascinating event.

Destination Dissertation Feb 24 2021 Your dissertation is not a hurdle to jump or a battle to fight; as this handbook makes clear, your dissertation is the first of many destinations on the path of your professional career. *Destination Dissertation* guides you to the successful completion of your dissertation by framing the process as a stimulating and exciting trip—one that can be completed in fewer than nine months and by following twenty-nine specific steps. Sonja Foss and William Waters—your guides on this trip—explain concrete and efficient processes for completing the parts of the dissertation that tend to cause the most delays: conceptualizing a topic, developing a pre-proposal, writing a literature review, writing a proposal, collecting and analyzing data, and writing the last chapter. This guidebook is crafted for use by students in all disciplines and for both quantitative and qualitative dissertations, and incorporates a wealth of real-life examples from every step of the journey.

Arduino and Raspberry Pi Sensor Projects for the Evil Genius Dec 13 2019 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Fiendishly Clever Sensor Projects for Your Arduino and Raspberry Pi Learn to quickly build your own electronic gadgets that monitor, measure, and react to the real world—with no prior experience required! This easy-to-follow guide covers the programming and electronics essentials needed to build fun and educational sensor-based projects with both Arduino and Raspberry Pi. Arduino and Raspberry Pi Sensor Projects for the Evil Genius features step-by-step DIY projects that use inexpensive, readily available parts. You will discover how to use touch, temperature, moisture, light, sound, and motion sensors—even sensors that detect the presence of a human! Start-to-finish Arduino and Raspberry Pi projects include: • “Simon Says” game • Rotary encoder that controls an RGB LED • Reed switch door buzzer alarm • Fire alarm • Sound detector • Light clapper • Glass break alarm • Infrared motion detector • Distance sensor intruder alarm • Collision alarm • TFT color display screen • Door entry alarm with SD card logging • And many more

Digital Transformation of Learning Organizations Mar 28 2021 This open access volume provides insight into how organizations change through the adoption of digital technologies. Opportunities and challenges for individuals as well as the organization are addressed. It features four major themes: 1. Current research exploring the theoretical underpinnings of digital transformation of organizations. 2. Insights into available digital technologies as well as organizational requirements for technology adoption. 3. Issues and challenges for designing and implementing digital transformation in learning organizations. 4. Case studies, empirical research findings, and examples from organizations which successfully adopted digital workplace learning.

The Complete Idiot's Guide to Computer Basics, 5th Edition Mar 08 2022 The fifth edition of The Complete Idiot's Guide to Computer Basics places the reader in charge of the computer, rather than the other way round, and places the focus on software troubleshooting rather than hardware techno-babble. The reader wants to do something practical with his or her computer - this book shows them how. It covers basic office programs and how to manage photo, video and music files. It offers advice on safe web-surfing, including coverage of newsgroups, message boards and mailing lists. There are new green computing initiatives that help protect the environment. It includes maintenance and upgrading information.

Natural Speller Jan 26 2021 Absolutely the only book you will ever need to teach spelling. Teaching strategies include additional tips for use with the learning disabled, and word lists are organized by both sight and sound patterns. Build vocabulary skills with Latin and Greek roots and word lists, and by using the spelling rules to add prefixes and suffixes to root words. Choose from among the suggested activities to include practice with grammar, dictionary, and composition skills. Phonic, spelling, and punctuation rules are listed for easy reference. Word lists are divided by grade, 1 through 8. However, this method is easily adapted for older students or adults who need remedial work. Because of its multi-sensory and simplified approach to spelling, and because each child can work at his own pace, this program is ideal for students with learning disabilities. Grades K-12.

Art and Emancipation in Jamaica Oct 03 2021 Coinciding with the bicentenary of the abolition of the British slave trade, this multi-disciplinary volume chronicles the iconography of sugar, slavery, and the topography of Jamaica from the beginning of British rule in 1655 to the aftermath of emancipation in the 1840s. Focusing on the visual and material culture of slavery and emancipation in Jamaica, it offers new perspectives on art, music, and performance in Afro-Jamaican society and on the Jewish diaspora in the Caribbean. Central to the book is "Sketches of Character" (1837-38)--a remarkable series of lithographs by the Jewish Jamaican artist Isaac Mendes Belisario--the earliest visual representation of the masquerade form Jonkonnu. Innovative scholarship traces the West African roots of Jonkonnu through its evolution in Jamaica and continuing transformation today; offers a unique portrait of Jamaican culture at a pivotal historical moment; and provides a new model for interpreting the visual culture of empire.

Information Technology Feb 07 2022 Information Technology: Made Simple covers the full range of information technology topics, including more traditional subjects such as programming languages, data processing, and systems analysis. The book discusses information revolution, including topics about microchips, information processing operations, analog and digital systems, information processing system, and systems analysis. The text also describes computers, computer hardware, microprocessors, and microcomputers. The peripheral devices connected to the central processing unit; the main types of system software; application software; and graphics and multimedia are also considered. The book tackles equipment, software, and procedures involved in computer communications; available telecommunications services; and data and transaction processing. The text also presents topics about computer-integrated manufacturing; the technology of information processing and its

business applications; and the impact of this technology on society in general. Students taking computer and information technology courses will find the book useful.

Ultimate Guide: Plumbing, Updated 5th Edition Nov 23 2020 Learn how to make both minor and major DIY repairs and improvements that will save you money! No need to hire a plumber, especially in emergencies when you need an immediate fix. This best-selling guide on plumbing will teach you everything you need to know, from understanding how plumbing systems work and fixing a leaky faucet to making renovations, soldering copper, installing fixtures, and so much more. Featuring detailed how-to diagrams, code-compliant techniques, tips on how to spot and improve outdated or dangerous materials in your home plumbing system, and so much more, this newly updated edition features new code-compliant techniques for 2021, plus a new section on air gap fittings.

French Resistance Aug 01 2021 French Resistance examines France's determination to remain aloof and unaffected as the world economy threatens the French way of doing business. Initiating change in any organization is never easy. Initiating change in a French organization is still more difficult. In this revealing and entertaining book, Michael Johnson describes the obstacles he encountered in his attempt to modernize the working practices of a Paris firm. His observations are based upon customs and habits peculiar to the French, yet they apply equally to all foreign cultures. Management methods, attitudes towards the outside world, and the historic roots of the French mentality are viewed and explained anecdotally through the prism of the author's many years' personal experience living and working there. Illuminated by the author's humorous illustrations, this is essential reading for all managers and business people who need to deal with unfamiliar territories.

Pathwise Estimation and Inference for Diffusion Market Models Apr 28 2021 Pathwise estimation and inference for diffusion market models discusses contemporary techniques for inferring, from options and bond prices, the market participants' aggregate view on important financial parameters such as implied volatility, discount rate, future interest rate, and their uncertainty thereof. The focus is on the pathwise inference methods that are applicable to a sole path of the observed prices and do not require the observation of an ensemble of such paths. This book is pitched at the level of senior undergraduate students undertaking research at honors year, and postgraduate candidates undertaking Master's or PhD degree by research. From a research perspective, this book reaches out to academic researchers from backgrounds as diverse as mathematics and probability, econometrics and statistics, and computational mathematics and optimization whose interest lie in analysis and modelling of financial market data from a multi-disciplinary approach. Additionally, this book is also aimed at financial market practitioners participating in capital market facing businesses who seek to keep abreast with and draw inspiration from novel approaches in market data analysis. The first two chapters of the book contains introductory material on stochastic analysis and the classical diffusion stock market models. The remaining chapters discuss more special stock and bond market models and special methods of pathwise inference for market parameter for different models. The final chapter describes applications of numerical methods of inference of bond market parameters to forecasting of short rate. Nikolai Dokuchaev is an associate professor in Mathematics and Statistics at Curtin University. His research interests include mathematical and statistical finance, stochastic analysis, PDEs, control, and signal processing. Lin Yee Hin is a practitioner in the capital market facing industry. His research interests include econometrics, non-parametric regression, and scientific computing.

100 Names of God Daily Devotional May 30 2021 Experience the peace, joy, and hope that come from deepening your understanding of who God is with the 100 Names of God Daily Devotional! From Adonai to Jehovah-Jireh, each of these stunning full-color daily devotions usher you into the very presence of God by having you reflect on who God is. In God's names, you will find new reasons to worship him, trust him, and praise him even more! Each devotion is short enough to read in just 5-minutes and deep enough to enrich your quiet times with the Lord as you discover the promise and hope of each name: Adonai —means “The Lord” or “My Great Lord” El Shaddai—“The All-Sufficient One” Jehovah-Rapha —“The Lord Who Heals” Jehovah-Jireh —“The Lord Who Provides” Each of the daily devotions covers: 1 specific name of God (such as Adonai) Its meaning Encouraging explanation and inspirational reflection Other related Scripture and cross references Personal question, prayer, and practical application Tap into the incredible beauty and wonder of God's names with every page of this Christian devotional and develop a deeper relationship with your Creator, Protector, and Father. Perfect for group and individual Bible studies, gifts, church libraries, and more.

Pectins and Pectinases Mar 16 2020 Pectins are one of the classes of complex structural plant cell wall polysaccharides. They are localized in the middle lamella and

primary cell wall of higher plants. Pectins have a long-standing use as gelling agents whereas their enzymatic degradation or modification plays an important role in the processing of agricultural crops and the manufacturing of foods and beverages. Progress in pectin and pectinase research has been most prominent in two areas over the past 5 years. The first one concerns the analysis and elucidation of the complex chemical structure of pectin and identification of novel enzymes involved in the degradation of these structures. The second area concerns the mode of action and the 3-dimensional structure of various pectin degrading enzymes as well as the cloning of a large number of genes encoding enzymes involved in pectin degradation and modification. This book covers the following topics. First the structural, physical and chemical properties of pectin are treated followed by information about its biosynthesis and about the biological effects of pectin and its degradation products in biological systems such as plant-pathogen interactions and human nutrition. Identification of novel enzymes, the mode of action of different pectinases and the 3-D structure of bacterial pectate lyases forms the second block. This is followed by the genetics and regulation of pectinase biosynthesis in saprophytic and phytopathogenic microbial systems as well as in plant systems. Finally, developments in pectin manufacturing and application of pectinases in traditional (food, beverage) and novel technologies are treated. This book is meant for those actively involved in fundamental and applied aspects of pectin and pectinase research but it is also of value for those interested in plant cell wall biosynthesis and architecture, phytopathology, food technology and human nutrition. This book not only reflects the present status of research in the field but it will turn out to be a very useful reference work as well.

Rosicrucian Principles for the Home and Business Jun 30 2021 2013 Reprint of 1935 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. Learn to use practical Rosicrucian principles to help solve your everyday problem both at home and in business dealings. This book gives you specific examples of how to attain health, happiness, and success. Avoid the delays and disappointments that stand between you and your goals by recognizing the right and wrong ways to use metaphysical and mystical principles. Spencer was a founder of the Ancient and Mystic Order Rosae Crucis (AMORC), a modern revival Rosicrucian order headquartered at San Jose, California. Lewis was born in Frenchtown, New Jersey, November 25, 1883, of Welsh ancestry. In 1904 Lewis founded and served as president of the New York Institute for Psychical Research. The institute specialized in occult studies with emphasis on Rosicrucian teachings. The AMORC was organized in several stages over the next years, and by 1917 held its first national convention in Pittsburgh, at which Lewis established his plan to develop correspondence courses. AMORC taught philosophical and mystical practices in order to develop the latent faculties of man, and it sold literature by mail order. Lewis himself authored the basic set of correspondence lessons and a number of the books published by AMORC.

Color and Human Response Nov 11 2019 "Birren presents a kaleidoscopic view of color information that has been a source of fascination." -- Color Research and Application "Keeps up with the latest developments in biology and psychology where light and color are involved." -- AIA Journal Here is a major work by one of the best-known color authorities in the world. Faber Birren pioneered in the field of "functional" color, using color properties to promote human welfare psychologically, visually, and physiologically; in this volume he has assembled a wealth of information on the subject. Color and Human Response offers intriguing factual and hypothetical observations on the influences of color in life, supported by historical references and the latest scientific data. Birren explores the biological, visual, emotional, aesthetic, and psychic responses to color -- referring both to ancient symbolic uses of color as well as its application in the modern environment. His specifications for color in homes, offices, hospitals, and schools are geared toward relieving modern tensions and anxieties. Complete with drawings, color photographs, and a chapter on the personal meaning of color preferences, Color and Human Response will fascinate anyone concerned with the human environment, including scientists and psychologists. It has become a basic reference for architects, teachers, and interior and industrial designers.

Students' Guide to Information Technology May 18 2020 Students' Guide to Information Technology, Second Edition provides up-to-date coverage of significant developments in information technology, including office automation, telecommunications, expert systems, computer-aided manufacture, and computer-based training. The book first offers information on computers and computer peripherals and applications. Discussions focus on how a microprocessor handles information,

microprocessors and logic, neural networks, digital signal processors, processing speeds, computer memory, monitors, printers, and input and storage devices. The manuscript then surveys computer software and technical convergence. Topics cover analogue and digital information, audio and video systems, technological convergence in audio systems, compact disc for multimedia applications, interactive video, programming languages, operating software, operating system commands, application software, and software reliability. The publication tackles the role of information technology in manufacturing and in the office, communications, and information systems. Concerns include electronic data interchange, computer-aided design, data processing systems, office automation systems, and dataflow diagrams. The manuscript is a dependable source of data for computer science experts and researchers interested in information technology.
