The Diamond District **Oct 15 2022** Following up on his New York Times bestselling memoir hip hop kingpin 50 Cent has created his own line of "street fiction" novels featuring bestselling urban fiction authors called G-Unit books. D.J.'s got an Ivy League diploma, the sexiest girl in the city, and the five best friends a dude could want. What he doesn't have is cash. When Dre, steals some ice from a thug after a fight, D.J. comes up with a get-rich-quick scheme worth thousands of dollars. But in this high-stakes game, you don't lie, cheat, and steal without paying the price, and after staring down the barrel of a handgun, D.J. learns a lesson that college didn't teach him. Now which will he choose -- the straight and narrow the streets?

Acetaldehyde-Related Pathology **Aug 01 2021** Part of the prestigious Novartis Foundation series, this is the first book to review the pathology associated with acetaldehyde, a known carcinogen found in cigarette smoke and other pollutants and derived from ingested alcohol, among other sources. In the body, acetaldehyde affects several tissues, particularly the brain and liver, causing various diseases, including cancer, alcoholic liver disease and Alzheimer's. Acetaldehyde-Related Pathology describes the toxic effects of acetaldehyde at the tissue and cellular levels, reviewing enzyme biochemistry, transgenic mouse models of alcohol dehydrogenase mutants, and the cell-signalling pathways implicated in alcohol-related pathology. It explores the mechanisms of acetaldehyde-induced damage to tissues, often the first step in carcinogenesis, including the oral cavity, the human airway, and the GI tract. The book considers pharmacological strategies and treatments for reducing oral and intestinal acetaldehyde. Acetaldehyde-Related Pathology features in-depth, round-table discussions with an international array of scientists from major laboratories worldwide involved in studying acetaldehyde-related pathology. This book is essential reading for anyone interested in the effects of this compound - pathologists, biochemists, toxicologists, cell and molecular biologists.
